

Project Delivery Manager

Location: Hybrid – Cornwall- 6 weekly team contact days in Hayle, Cornwall (regular UK travel required)

Salary: Competitive (dependent on experience)

Closing Date – 10th August 2026

About Celtic Sea Power

Celtic Sea Power is a leading marine energy organisation delivering projects that accelerate the transition to a low-carbon future. We work with industry, government, academia and communities to develop innovative solutions across offshore renewable energy and the blue economy.

The Role

We are looking for an organised and proactive **Project Delivery Manager** to join our growing team.

You will be responsible for managing the successful delivery of a portfolio of projects, coordinating delivery teams, contractors, partners and stakeholders to ensure projects are delivered safely, on time, within budget and to the highest professional standards.

This is an excellent opportunity for an experienced project manager who enjoys working across multiple programmes, building strong relationships and turning plans into successful outcomes.

You'll be responsible for:

- Managing day-to-day delivery of multiple projects and work packages.
- Developing project plans, schedules and reporting.
- Monitoring budgets, risks, milestones and performance.
- Coordinating contractors, consultants and delivery partners.
- Building strong relationships with clients, funders and stakeholders.
- Supporting governance, quality assurance and continuous improvement.
- Contributing to business development by identifying follow-on opportunities and supporting bids.

Pembroke Dock, Wales SA27 6UP

Celtic Sea Power Limited

Company Registration No 10166467 / Vat Registration Number – 375 2177 84

About You

You'll have:

- Proven experience delivering complex projects.
- Excellent planning, organisational and communication skills.
- Experience managing stakeholders and multidisciplinary teams.
- Strong commercial awareness and risk management skills.
- A degree or equivalent professional experience.
- A recognised project management qualification (PRINCE2, APM or equivalent) would be an advantage.

Experience within renewable energy, infrastructure, marine, innovation or publicly funded projects would be beneficial but is not essential.

What We Offer

- Flexible hybrid working.
- Opportunity to work on nationally significant renewable energy projects.
- A collaborative and supportive team environment.
- Professional development opportunities.
- The chance to help shape the future of the Celtic Sea and the UK's clean energy transition.

How to Apply: Please download the job description from our website. Then please submit: -

1. An up-to-date CV (max 2 pages A4)
2. A supporting statement (max 2 pages A4) explaining how your experience matches the criteria
3. To promote an inclusive workplace and ensure reasonable adjustments where necessary, we encourage applicants to complete the equality and diversity monitoring form. This information remains confidential and is used solely for monitoring purposes.
4. Email your application to: enquiries@celticseapower.co.uk Deadline: Monday 10th August 2026 = 9.00am GMT
5. At Celtic Sea Power, we are helping to shape the future of offshore renewable energy while creating lasting economic and social impact. If you're an enthusiastic project professional looking to make a real impact, we'd love to hear from you.
